KEY PERSONNEL

Ernest W. Loesser
President

Description

Unit Pack was founded in 1964, when the production line for the first Saran Wrap film pouch was introduced. Today, we are a leading producer of single-dose film dispensing packaging. Our state-of-the-art facility is designed for flexibility, and our rapid changeover ability assures consistent on-time delivery.

We recognize not only the importance of providing the best products and services, but also of forging partnerships with our customers in cosmetics, pharmaceuticals and industry.

The Unit Pack name is synonymous with innovative research and improvements in *unit-of-use* packaging. We stand ready to serve all of your packaging needs.

**Products**

The Unit Pack is the effective way to fulfill your sampling and unit-of-use packaging needs.

Unit Pack produces flexible unit-of-use pillow pouches in any size from 0.5 mL through 30 mL. Hot-stamped decorated packs are available in clear or white. The Unit Pack is a study in effective packaging design. The easy tear tip is just that, easy to tear. Once the package is opened, a metering channel remains providing excellent product dispensing.

Unit Packs are manufactured with fully recyclable materials. Unit Pack is an FDA inspected and Certified Organic Facility. All applicable GMPs are in place.

What's New

In the last three years, in keeping with our commitment to product innovation, Unit Pack has introduced new packaging materials. These new films, with which we now produce pouches, have barrier properties that are tenfold greater than previous packages. The new films are fully recyclable. We make no unverifiable claims of being "green." We like it simple: "Our packs can be recycled." That's it.

Unit Pack is now certified as an "organic" repackager. The certification has been in place for two years. The organic movement has shown significant growth. We are proud to have facilities that serve this need.
