

Lifting Gear Hire

Lifting Equipment Rental Specialists

Who We Are

Over the past twenty-four years, Lifting Gear Hire (LGH) has been serving professionals in all types of industries. In 1990, LGH started out on what would become a long journey with only one thing in mind:

To Become the Best. Since 1990, LGH has had tremendous success.

Today, LGH is the United States' largest single organization devoted exclusively to the provision of lifting and moving equipment for rent and sales.

Through our 19 locations in the U.S., supported by over 45 Rental Representatives nationwide, LGH can provide, for rent or sale, hoisting, pulling, jacking and rigging equipment to meet virtually every conceivable lifting or moving need. LGH does this by holding the most comprehensive inventory of equipment for hoisting, pulling and jacking, whether for simple everyday tasks or for special projects where expertise has to be matched with availability of the right equipment, in sufficient quantity. All of this equipment has been carefully selected by LGH for its durability and longevity. All rental stock is maintained in excellent condition to be ready for immediate and, above all, safe use.

LGH's Mission and Vision

The LGH mission is genuine and simple...

LGH's mission is to offer expertise in the rental of the safest and most reliable hoisting and rigging equipment to build and support a better America.

At LGH we value our customers and strive to provide them quality service with our vision in mind. Our Vision is...

LGH is the leading expert in the rental of hoisting and rigging equipment with an unmatched reputation for safety, quality, and reliability. LGH sets the industry standard with our extensive rental inventory and the expertise and knowledge of our workforce is unsurpassed. The LGH team shares a common purpose to serve our customers with passion, motivation, and dedication, as we continually work together to exceed all expectations.

Our Commitment to Professionalism

The success of LGH owes much to our commitment to lifting engineering and our commitment to professionalism in everything we do.

We are professional in the selection of the extensive range of equipment we offer for rent or sale. We are professional in the way in which we ensure that every item of equipment we stock is safe and ready for use. We are professional in the way we seek to meet customers' needs. From the initial advice we provide to assist in correct equipment selection, through the efficiency of our quote processing to our logistics and distribution systems, we ensure that the right equipment is delivered to the right place at the right time.

These levels of professionalism are only achieved by dedication, preparation, hard work and a willingness to assess all aspects of our company's operations. This continuously ensures we achieve optimum levels of efficiency in all areas.

Our Practices

Internal Audits at LGH

At LGH, we carry out an annual program of internal audits at each warehouse, looking at both operational and administrative practices and procedures.

Apart from monitoring our administrative efficiency, we also carry out in-depth audits of all workshop practices, examining equipment, maintenance, personnel efficiency, and safety.

Training

The success of LGH relies very much on the emphasis we place on staff training – both in-house and training seminars by our key suppliers.

LGH provides training for all sales staff, together with comprehensive courses for distribution center personnel in our fully equipped centers. The aim is to improve safety and training skills in line with specific safety requirements, as well as to promote the effective and safe use of our lifting and moving equipment.

Practical workshop activities are presented by our Safety Administrator – to our in-house staff, as well as to our customers. All of our training programs observe the latest statutory and legal requirements.

Testing

LGH has a 125,000 lb Dynamic Vertical Proof testing machine capable of dual load range testing as well as a 300,000 lb Dynamic Horizontal Proof Test Machine measuring 72 feet long and fully equipped with a computer and Chant Datatest software, as well as fixtures for winch mounting.

These pieces of equipment were added to our distribution center in a conscious effort to always deliver the safest equipment to our customers, and now as a way for our customers to obtain safety certification to their own equipment right from Lifting Gear.

Just another way for us to make sure **we put your safety first.**

Service & Maintenance From Start to Finish

Service and maintenance are very important activities within LGH's total sphere of operations. Over the years, we have developed these functions, at our locations to ensure that we sustain our leadership in the market and our reputation for quality in the rental field.

Serving You

Rental

In many industries, the duration of a lifting or moving operation is most frequently only short or medium term. Consequently, the need for equipment is often in line with this so that rental can offer economic advantages over outright purchases.

There are several advantages to renting. For example, you do not have to worry about equipment records, maintenance or certification. You also delegate the burden of statutory obligation.

Renting means that you can forget about long term equipment storage space and allows for more accurate project cost control. Renting does not involve capital costs, and therefore frees capital for other uses.

Renting means you do not have to make do with limited or obsolete equipment. You can choose exactly the right piece of equipment to do a specific job, effectively and safely.

Sales

To meet the needs of customers who have a consistent requirement of an item of equipment, and indeed for those who prefer to buy rather than rent, Lifting Gear Hire offers a wide portfolio of products for sale.

This portfolio includes items which, based upon our long experience, have been chosen because they have proved to be extremely durable and ready to use as well as providing serviceability and value. Rental gives a product the ultimate test of constant varied use. LGH chooses wisely and offers its customers the same choice.

Our Promise to You

Lifting the Standards

At LGH, we believe that being professional means accepting professional responsibilities.

We do this by continuing to set the standards throughout the lifting and engineering industry. We go beyond the limit in our commitment to statutory and legal obligations in the inspection of our equipment.

We have our own range of testing equipment, where necessary, to simulate equipment working conditions as closely as possible and insist that all our staff are trained to the highest degree possible to fulfill their particular job function.

For we strongly believe that, as leaders in lifting engineering, we must continuously improve our standards.

Our Focus on You

LGH is very much a customer-focused organization. So you'll find it comforting to know that everyone in our service team from our national rental center to our sales representatives and from warehouse staff to the delivery guy, recognize that when it comes to your needs, second best is just not good enough.

As the industry leader, we take pride in providing top notch service. That's why we continually develop our superior service standards, processes and employees.

LGH Rental Inventory Breakdown

Lifting Gear Hire has a high quantity of rental inventory in its rental stock as well as having inventory in its new stock as well. The following is a list of the top 20 pieces of rental equipment that we currently have in our rental fleet:

Lifting Gear Hire alone has over \$32.5 million dollars of rental stock and this number grows every day. LGH is able to provide a great deal of lifting, pulling, jacking, or any other type of rigging equipment for rental or sale at very short notice.

LGH Approved Vendors

Lifting Gear Hire has carefully selected our vendors based on quality, delivery, and performance. We rarely change our vendors for any reason except for non-compliance and possible quality problems. Brands like Harrington, Ingersoll Rand, Tractel, TK Simplex, Enerpac, J.D. Neuhaus and Spanco to name just a few.
