When you choose Commonwealth Sign Company, you choose a complete sign service and total project management solution. Our state-of-the-art design and manufacturing center can turn your sign concept into a high impact, professional branding piece.

overview

Commonwealth Sign Company

Since 1979, Commonwealth Sign Company, Inc. has offered fast and affordable total project management for signage projects of all types and budgets. From national, multi-site corporations, to small businesses in Metro Louisville, Commonwealth Sign is dedicated to excellence and craftsmanship in all facets of our business.

Our design staff can help take your simplest idea or your most complex concept and make it work. We will help you through challenges related to your location, property restrictions, or special visibility needs.

Our manufacturing facility with 17,000 sq ft of space is fully equipped to handle any signage project, large or small.

design

Design

Commonwealth takes great pride in having a top quality design staff to create and design a product that will more than satisfy the needs of your business. We can work with you on logo creation or take your current logo and build a sign that will enhance your image in the marketplace. All designs create the templates to manufacture your sign to the highest level available in the industry.

manufacturing

Manufacturing

With fast set-up and production runs tailored to your project, we can create virtually every sign imaginable meeting or beating your deadline and budget. Our wide range of fabrication equipment offers you a full selection of in-house manufacturing options including:

- Vacuum-formed, solar grade Lexan for guaranteed durability using our vacuum form machine.
- Industrial CAM routing system for intricate detail and unlimited duplication of product.
- All aluminum channel letter fabrication using our state of the art Accu-bend machine allows for rapid creation and completion of projects.
- In-house neon production for a bold look or LED illumination for a more economically operational sign.
- EPA-approved painting technology, with computerized mixing.
- Electrical signs that are UL listed and in accordance with national, state, and local electrical codes.
- Indoor and outdoor LED electronic message units and display boards for every need and occasion.
- Full color digital printing for indoor and outdoor images.
