AIRBUS

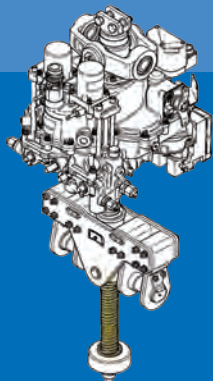

Why pay more from the OEM when you can get quality service at a competitive price?

As a leading FAA, EASA, and CAAC certified Repair Station, Skytronics, Inc. provides complete repair and exchange services for Airbus Trimmable Horizontal Stabilizer Actuators (THSAs).

EASA and FAA Airworthiness Directives (AD) and Airbus Service Bulletins (SB) require repetitive detailed inspections of the THSA for continued airworthiness. You can rely on Skytronics for inspection, test, repair and overhaul requirements with SAME DAY forward exchange service to avoid AOGs.

ON TIME. EVERY TIME.

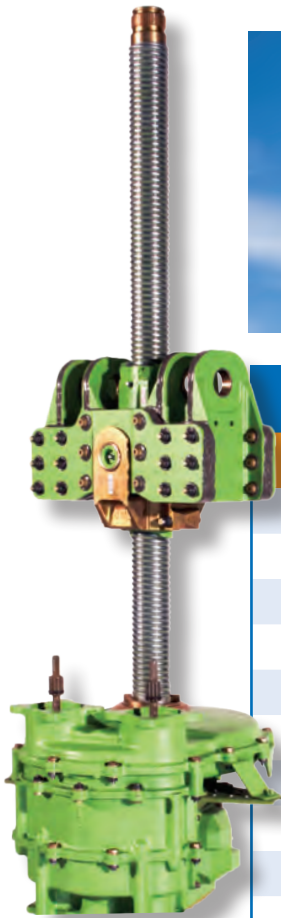

SKYTRONICS SPECIALIZES IN THE FOLLOWING:

- Test and Repairs
- Overhauls & Exchange Units
- Ball Screw Assembly, Screw Shafts, Ballnut Test, Repairs, Overhauls and Replacements.
- Hydraulic Motor Test, Repairs, Overhauls and Replacements
- Hydraulic Brake Test, Repairs, Overhauls and Replacements

State-of-the-Art In-House Ball Screw Overhaul and Testing Capabilities

Skytronics, established in 1956, is an FAA, EASA and CAAC certified repair station committed to providing superior repair and overhaul services that enhance the safety and operational performance of your fleet. We maintain an extensive inventory and have the fastest turn-time in the business. Skytronics is a Boeing-approved maintenance provider.

BOEING

Skytronics is an approved and preferred Boeing HSTA overhaul service provider.

Skytronics has over 40 years of experience in the overhaul, repair and exchange of HSTAs for operators, MROs and third parties. With a comprehensive rotatable pool HSTA inventory, our customers enjoy “SAME DAY” forward exchange service to meet critical time requirements.

Skytronics has the fastest HSTA turn times in the industry. We specialize in Boeing HSTAs, and have ball screws, hydraulic brakes and motors in stock that are overhauled on site.

- Pitch Trim Actuator Electronic Test and Replacements
- Workscopes provided with FAA, EASA dual release and/or with a CAAC 038 release.
- OEM of Boeing HSTA Ball Screw Assemblies 707, 720, KC135, 727, 737, 747
- Alternative Means of Compliance (AMOC) proposals provide savings by avoiding high OEM replacement costs
