

UPSCALE TRASH/RECYCLING RECEPTACLES
WWW.T2-SA.COM

Construction Material Options

We're not "married" to any given material. We can therefore give you sound advice on the pros/cons of various materials.

Feel free to give us a call to review your requirements based on your aesthetic, operational, green and budget objectives.

Material	Description	Where Situated
Powder Coated Steel	Provides an even paint coat across the steel surface without any drip marks. A wide variance of color options from Glossy to Textured. 30% recycled content. 100% post consumer recyclable.	Indoors or outdoors depending on specific model.
Stainless Steel	Most of the Stainless Steel we provide has a brushed look. Most Stainless Steel products have a higher price point than powder coated steel products. Usually 60% recycled content. 100% post consumer recyclable.	Indoors or outdoors depending on specific model.
Aluminum	Lighter weight than steel. Impervious to rust or corrosion. The Satin Aluminum has the look of Stainless Steel. Also available in Satin Brass Aluminum. 10% recycled content. 100% post consumer recyclable.	Indoor or outdoors.
Fiberglass	Widest range of color/finish options with over 50 colors/finishes available. Most colors available in Glossy, Satin or Matte finishes. Impervious to rust or corrosion. Great in heavy salt air environments. Greater flexibility and creating custom shapes. If used outside, put it in an area not subject to high winds. 25% recycled content. 100% post consumer recyclable.	Indoors or outdoors
Neowood	Neowood is constructed from recycled milk bottles. The Neowood is the most durable material we offer. Will not rust, corrode, flake chip or discolor. Impervious to mold, salt air, chlorine air, and insects. Our Neowood products also have many matching site amenity products including towel valets, benches, planters, portable bars and check in desks. Available in Green, Black, Tan White Brown or Grey. 97% recycled content. 100% post consumer recyclable.	Indoors or outdoors
Concrete	The heaviest material. Concrete products are typically placed outdoors based on their weight. No worries about rust or corrosion. Can make sense if you like the look or are concerned about high winds or theft. 15% to 30% recycled content. 100% post consumer recyclable.	Indoors or outdoors.
Glass Reinforced Concrete	A mix of concrete and fiberglass. About 1/3 the weight of concrete. Thinner walls than concrete. Like concrete, no worries about rust or corrosion. Also makes sense if you like the look or are concerned about high winds or theft. 0% recycled content. 100% post consumer recyclable.	Indoors or outdoors
Wood	We offer solid hard woods (Audubon series) that can be used outside. The solid hard wood units should be resealed several times a year to keep its color. Veneers do not require resealing. However, veneers are for indoor use only. 0% to 20%. 100% post consumer recyclable.	Solid hard woods for indoors or outdoors. Veneers for indoor use only.
Polyethylene (Virgin Plastic)	Mostly, less expensive compared to any other materials. Lightweight. We offer great looking guest room wastebaskets, planters, and benches constructed from this material. Use outdoors if protected from high winds. Limited color selection. 0% recycled content. 100% post consumer recyclable.	Indoors or outdoors

Upscale Recycling & Trash Receptacles

Why T2 Site Amenities?

- We represent over 35 upscale site amenity manufacturers giving you an dazzling array of choices.
- The widest selection of materials...powder coated steel, stainless steel, aluminum, fiberglass, concrete, fibercrete, fine woods, recycled & virgin plastic.
- One contact to coordinate product information, pricing and order tracking.
- Customization options to meet your design, operational and cost requirements.
- Many matching products to provide a cohesive look among the receptacles, planters and benches.
- We offer a full complement of site amenity products including recycling centers, trash receptacles, benches, planters, pool towel valets, bike racks, bollards, outdoor tables, and much more.
- You save valuable time with our expert guidance. Simple, easy, elegant.

TAO

The Art of Recycling

- Magnificent clean lines. A statement for your high profile areas. Indoor use only.
- Steel frame available in a wide range of powder coated painted finishes.
- Choice of Wood Veneered Panels (Maple , Cherry, Walnut and Ebonized stains) or Wilsonart Plastic Laminate.
- Stainless Steel lids offer many opening and signage options. Signage is silk screened. Hinged lids provide access for emptying trash.
- Includes folding steel internal bag holding system to secure the poly bags.
- Made in the USA.

Zen Planter Option

Add a touch of Zen to your recycling centers by adding the integrated planter. See above left image. Each planter container is 10" deep and is either 13.5" W x 19.5" D or 19.5" square depending on the model chosen.

Available on any 2, 3 or 4 stream unit.

Standalone planters that match the Tao recyclers are available.

Available in all 18, all 30, or a mix of 18 & 30 gallon liners. Call 847-579-9003 for details.

TAO	Description/Capacity	Length	Depth	Height
EKT-6700 TAO Single	Single top load 18 gal.	14.5"	20.5"	30"
EKT-6701 TAO Dual	Double top load 2/18 gal.	27"	20.5"	30"
EKT-6702 TAO Triple	Triple Top load 3/18 gal.	39.5"	20.5"	30"
EKT-6703 TAO Quad	Quad Top load 4/18 gal.	52"	20.5"	30"

Understated and elegant in it's simplicity. Inset at bottom of receptacle provides a pleasing design element and is recessed on all 4 sides.

Interior use only.

The simple lines and material options of the Studio Series integrate seamlessly into lobbies, conference rooms, café areas, and private offices.

Wood Veneer Finishes: Oak, Rift Cut Oak, Cherry, Walnut, or Maple.

Horizontal or vertical grain direction. Brushed aluminum top with laser etched graphics.

Front doors open for easy access to internal rigid plastic liners.

Optional casters.

Made in the USA.

Optional aluminum lid hides the receptacle openings when not in use.

Hammered Charcoal base with Stainless Steel frames and Stainless Steel legs.

Gloss White finish with Stainless Steel frames and Stainless Steel legs.

Gloss White with Gold top frames and Gold legs.

METRO

The Metro series has become the standard for numerous hotel properties. It’s tapered, simple lines work in traditional to contemporary environments. Being only 14” in depth this unit sits flush to the wall away from traffic patterns. Optional casters gives the Metro great mobility when reconfiguring meeting rooms.

Designed for indoor use, the Metro is often found in lobbies, meeting spaces and cafes.

- Constructed from powder coated steel or stainless steel. Hammered Copper (shown) is the standard powder coated finish. Other finishes available for a slight up charge. Sample chips available.
- Each units comes with 3 recycling insert tops (Beveled Square, Paper Slot, and 4.5” round).
- Decal pack included. (TRASH, WASTE, CANS/BOTTLES, PLASTIC, COMPOST, RECYCLE and PAPER). Includes rigid plastic liner (18 gallons). Custom decals available.
- Hidden rubber feet raise it slightly off the ground to allow air-flow to prevent mold/mildew growth.
- 30% recycled content with the powder coated steel units. 60% recycled content with the stainless steel versions. 100% post consumer recyclable. Made in the USA.

Optional above co-mingle recycling insert helps drive recycling compliance.

STAINLESS STEEL INDOORS

Stainless Steel strikes a perfect balance between durability and beauty. Use the larger units in lobbies, meeting spaces, cafes and elevator bays. The smaller perforated trash/recycling wastebasket is great for guest rooms.

For indoor use only, this collection is constructed from heavy-gauge 304 grade steel. Fire and corrosion resistant. The rubber base protects the floors and keeps the unit in place.

The material also provides a hygienic surface which is easy to clean and has no pores to harbor dirt or bacteria. Constructed from 25% recycled steel. 100% recyclable. Made in China.

SAN MATEO

Aventura Bronze Satin finish

The San Mateo recycling receptacle. Organic looking and nature inspired.

Constructed from fiberglass, this unit will not rust or corrode. Works out great in salt water environments. UV and scratch resistant.

Its indoor/outdoor flexibility allows for one coordinated look among the receptacles and planters.

The San Mateo's exceptional durability allows the unit to be placed in both indoor and outdoor areas. Matching planters complete the look.

Two openings for trash and recycling. Can be modified with one opening. Includes split rigid plastic liner.

Wavy design hides dirt. Over 50 colors/finishes.

Made in the USA. 25% recycled content. 100% recyclable.

FRESCO SERIES

Glass Reinforced Fiberglass (GFRC) Receptacles

Receptacles constructed from concrete are very heavy. Once in place, they tend to stay put. However, many properties are still **looking for a product with some "heft" but not the weight of concrete**. The answer is fiberglass reinforced concrete or GFRC for short.

The above products constructed from GFRC are about 1/3 the weight of concrete. In short, a 200 pound GFRC receptacle would weigh about 600 pounds if constructed from concrete.

GFRC also has a smoother finish than concrete.

Available in a range of finishes & styles. Matching planters available.

All of the products you see above are made in the USA.

The Lotus Pod. Streamline organic shape.

High density polyethylene construction. For indoor/outdoor use. No worries about rust, corrosion, or discoloration. Great in salt air environments.

Wood like finish available Espresso or Walnut.

Lid easily snaps off base for access to rigid plastic liner.

Available as a trash only or recycling receptacle. The recycling receptacle comes with decals specifying Recycling, Paper, Plastic and Cans.

Matching planters. Made in the USA.

LOTUS POD

NEPTUNE

The Neptune Trash/Recycling collection. Good looks and versatility.

Polyethylene construction wears great in outdoor or indoor environments. Available with brown bases and taupe tops or blue bases and light grey tops. Custom colors and decals.

Slanted top design discourages placement of objects on top of receptacles. Labels on lids are durable molded in graphics.

Lid styles: Trash, Mixed Recyclable, Paper Only and Plastic Only.

Easy to Service, units include a liner with Grab Bag system to keep bag secure and out of sight. 3 sizes: 30 gal., 35 gal. & 40 gal.

25% recycled content. 100% recyclable. Made in the USA.

The Wakefield group is a good looking hybrid of powder coated steel and Neowood (recycled plastic that looks like wood).

Smooth, weather resistant, never needs painting or sanding. All receptacles include a rigid plastic liner.

Available in Mahogany & Cedar.

Matching benches available. Made in the USA. The Neowood has a 95% recycled content. 100% recyclable.

The innovative Trenton Receptacle (on left) is ergonomically designed with a tilt-out bin.

Removable 50-gallon bin slides out for easy trash removal, eliminates vertical lifting. Highly resistant to corrosion and impervious to moisture.

Includes steel trash liner, cam lock and key. Pre-drilled hold for easy surface mounting.

NEOWOOD

What is Neowood?

- Neowood is composed of 97% recycled HDPE # 2 plastic (recycled milk jugs). Our Neowood material purity dramatically increases the long term performance of the product.
- It is environmentally friendly too. Recycled plastic diverts waste from going into landfills and reduces our dependence on fossil fuels.
- Will not rust, corrode, flake, splinter or discolor. UV stable. Impervious to insects, mold and moisture.
- **Not all plastic wood is the same. Ours has is 97% pure. Most other sources for “plastic wood” use materials that have a 35% recycled content.**
- **The color goes all the way through the material. So if scratched, it’s barely noticeable.**
- Matching products. Our Neowood collection includes trash/recycling receptacles, pool towel valets, gym wipe dispensers, storage boxes, portable bars, check in desks, planters, and much more. As you add new Neowood products you can be sure that they will complement each other in look & color.
- Made in the USA.

3 Styles to best fit your look

ARUBA

Aruba series - Notice the posts extending over the top surface and raised legs. Rectangular disposal opening.

CAYMAN

Cayman series - Flat top. Posts do not extend over the top. Shorter legs. Rectangular disposal opening.

BERMUDA

Bermuda series - Posts extend over the top surface and raised legs. Decorative arch over the disposal and towel openings.

Choose type vertical bead board panels (left) or flat panel (right). Same price.

Choose your colors. Units can be two tone (one color for panels & another color for frames). Or one solid color.

Model #	Description/Capacity	Length	Depth	Height

HAVANA CURVED ROOF

Our Neowood collection continues with the Havana Curved Roof group.

Constructed from Neowood (97% recycled plastic). The most rugged material you'll find to withstand the great outdoors. No rust, no corrosion, no discoloration. Zero maintenance. Great in salt air environments.

Hinged side door opening provides easy access for your maintenance team to empty the trash.

The curved roof discourages placement of objects on the receptacles. When used outside, the curve top design deflects rain.

Many combinations. Single, double, top or side load. Includes rigid plastic liners.

Made in the USA.

MODA

Offering guest room recycling wastebaskets is one of the best ways to showcase your green initiatives.

The Moda series integrates two half round plastic liners for separating trash from recycling.

Having this dual purpose unit also reduces guest room clutter. After all, why have separate trash & recycling wastebaskets if one unit will do the job?

Available in #304 Stainless Steel (perforated or non-perforated) or a Black or Brown Leatherette wrap over a steel base.

The rubber guard on the base protects the floors and keeps the unit securely in place.

- This unit includes two removable Polypropylene half-round shaped 1.6 gallon liners.
- Convenient, extended lip on liner makes it easy to lift, empty & clean liners.
- Liner includes a recessed area for decal application.
- Decal set included with each can. Trash, Aluminum, Paper, Glass, Plastic and Mixed.
- 15% recycled steel content. 100% recyclable.

The Brim can. An excellent choice for extended stay properties, and hotel suites with kitchens. A covered step can is one of the best ways to control odors and insects. Also makes it easier to dispose of trash when both hands are full.

The Brim is the can that does the job with good looks and an even better price.

Plus it large 13" w x 17" deep opening makes it easier to dispose of boxes that normally would not fit in wastebaskets.

The Brim is constructed from polypropylene. The foot pedal in stainless steel triggers a soft close lid. A retention ring holds the poly bags securely. No more messy collapsed bags.

VENTI

The Venti. (on left). Can't you picture this can in at a coffee bar?

Great around vending areas. Use in an employee lunch room. Lightweight and easy to move around at a moments notice to pool areas.

This polypropylene container looks great. Plus, you'll love the price.

Swing top opening allows for easy disposal of trash while covering the opening. The retainer ring hides and secures the poly bag.

SMOKERS SOLUTIONS

Many people still smoke.

To be sure they have a safe place to dispose of the ashes & butts we **suggest our line of upscale smoker's solutions.**

Some units are designed to totally contain the ashes/butts. These self contained models help prevent wind blown ashes & butts from littering your property. Plus they do not require sand to snuff out the butts.

Many of our open top ash urns are shown on the following page. Many users prefer the open top version based on looks. Others prefer the open top because it is more obvious to the smoker.

Wall mounted units are discrete. However, they do require someone at your property to do the installation.

Besides the good looks, the wall mounted units help prevent theft.

Stand alone units (Items D, E, F & I) give you the flexibility to situate the unit where needed. No installation is involved.

Model #	Description/Capacity	Dia	Ht

There are many options for addressing disposal of ashes & butts.

You may prefer to have a unit whose sole purpose is the containment of ashes/butts.

Or you may prefer to have a unit that does double duty. That is, combines a trash receptacle with an ash/butt snuffer.

On this page, you'll find a range of choices.

A

B

The Ash Stax models (A & B), are very heavy duty and are designed for high use environments.

Available as wall mounted or stand alone.

C

Our Geneva series integrates a trash receptacle with a ash/butt container.

Available in Satin Aluminum, Satin Brass and a range of other colors.

Several sizes available.
