

The Critical Invisible

RD R D Rubber Technology Corp.
WE BUILD TRUST

We match our many options to your specific needs.

One of the traits that sets RD Rubber apart from the competition is our attention to detail and the way we combine our expertise in engineering and manufacturing with our resources. By doing this, we bring exactly the right materials and techniques to bear on your project.

Core Manufacturing Processes:

- Liquid Injection Molding (LIM)
- Injection Molding
- Transfer Molding
- Compression Molding

Support Services:

- Rubber-to-Metal Bonding
- Clean Room Molding
- Cryogenic Deflashing
- Post Curing Ovens
- Specialized Die Cutting
- Slitting Machines
- Ultrasonic Cleaning System
- Laminar Flow Bench
- Environmental Chamber

Competitive Advantages:

- Quality
- Technology

Engineering to exceed expectations every step of the way.

We exceed your expectations through superior product development engineering. We know how critical every part we manufacture is to your success, even if most people will never even see the part. Our professional approach to understanding all customer requirements begins the process of engineering quality into the part.

Through concurrent engineering we can assist you in further development for manufacturability including materials selection, proper tolerancing and molding methods to suit your application and meet your exact specifications.

We show our engineering expertise in many ways:

- Technical Assistance
- Tool Design
- Product Functionality
- Class A Tooling
- Materials Consulting
- Design and Development Support
- Precision Tolerances
- Complete Product Traceability
- Materials Testing Capabilities
- Grinding Capabilities of Rubber and Metal

Materials

- Silicone (LIM and HCR)
- Fluorosilicone Rubber
- Organic Rubber - EPDM, Butyl, Neoprene, Nitrile, Urethane, Polyisoprene, Natural Rubber, SBR et al.
- Fluorocarbon Rubber - Viton® and Fluorel®

Quality

RD Rubber engineers quality into every part we make. Our inspection is done at levels to fit your application, with capabilities that range from appropriate AQL's to 100% inspection. Our **ISO 9001:2015** Certified Quality Management System monitors every step of the process from quotation and order processing through final inspection and shipment.

- **ISO 9001:2015 Certified**
- Conform to Military Specifications
- MIL-I-45208A
- ANSI Z540-1
- GMP Standards

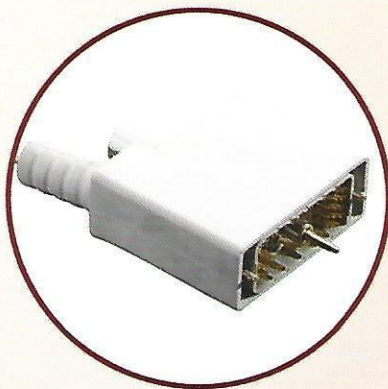

Our dimensional inspection capabilities include highly accurate measurements that range from .001" +/- .0002" up to 16.000". Our Quality Management System allows for complete Traceability and Statistical Process Control (SPC) to assure that your order meets your specifications.

Materials Testing:

Materials Testing in-house to ASTM Standards utilizing the latest equipment:

- Durometer
- Tensile
- Tear Strength
- Elongation
- Modulus
- Compression Set
- Heat Age Testing

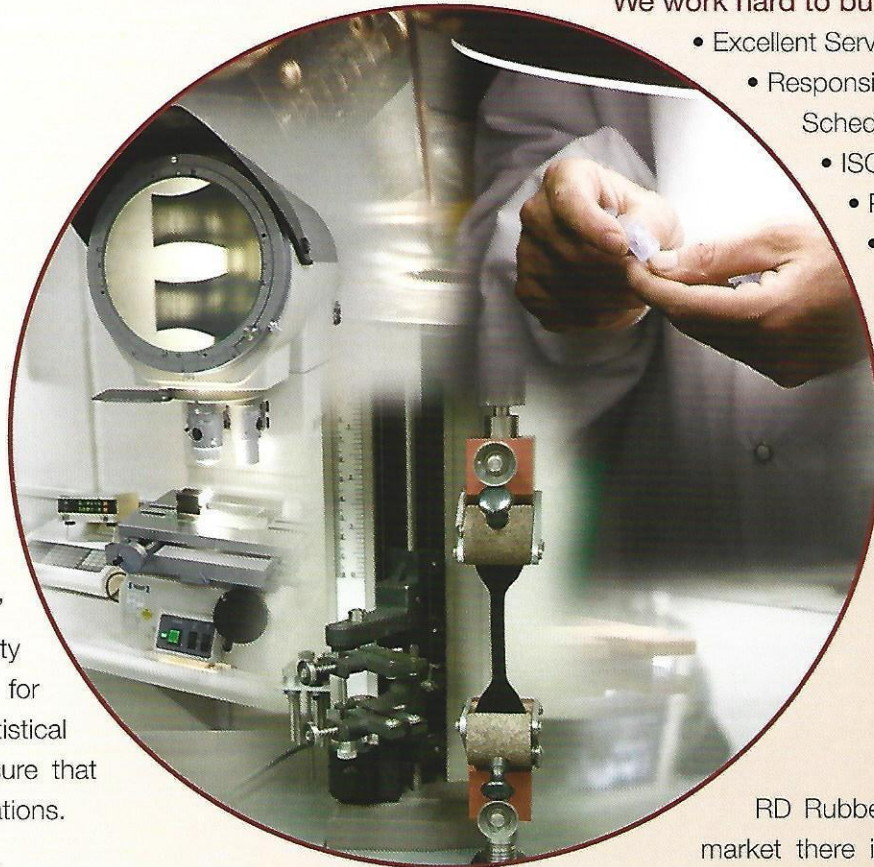

How we build trust.

What you don't see can make all the difference, which is why our parts are so critical to the industries we serve. We earn the trust of our customers, many of whom have been with us since we started out. We go through stringent and important quality control procedures beyond the demands of our customers. And we make sure that there are quality checkpoints at every development and production juncture.

We work hard to build your trust through:

- Excellent Service
- Responsive to Your Scheduling Needs
- ISO Quality System
- Prototyping Capabilities
- Concurrent Engineering
- Value Added Services
- Long Term Customers
- 20 Year Track Record

RD Rubber knows that in today's market there is a need for a custom rubber molding company that is responsive to customer needs and with systems and capabilities to insure that today's higher quality standards are achieved.

We understand the necessity of flexibility and are devoted to working with you, one-on-one, to assist you in meeting your needs. Our growth will always be dependent upon our ability to service our customers needs and still maintain the quality standards that RD Rubber Technology was founded upon.

Call RD Rubber or visit our website today and find out why so many customers absolutely depend on the integrity of our work.

Our mission is to provide our customers with the highest quality and best delivery of products and services possible at a fair price that meets or exceeds stated and unstated expectations. We are dedicated to remain in the forefront of the custom rubber molded components industry through continuous improvement and innovation while maintaining small company ideals with sophisticated manufacturing techniques. The operating principle of RD Rubber Technology is to always reach for never-ending improvements in the services and products we sell.

From Prototype to Production

In 1986, RD Rubber Technology was founded on the principle of hard work, an intense commitment to our customers, vendors and employees with attention to quality that is second to none. This is what set us apart at the time and continues to serve our customers to this day.

Our powerhouse team began by seeing a need that wasn't being met, to take its customers from initial short runs then ramping them up into high volume production runs while maintaining the highest quality standards. Within short order we brought in customers like Honeywell and the DOE, who, because of our unique approach are still doing business with us today.

Over the years, RD Rubber has diversified our market. We are constantly researching the newest technologies and maintain the strictest quality standards. Through our system, we are able to engineer quality into every part we make. We are committed to our customers, always supporting their needs, regardless of volume considerations. In fact, many of our original customers are still working with us. We continue to service them by maintaining our flexibility, individualized service and our close working relationships.

Our desire is to be involved in the development phase of a project, where we can assist our customers in making their prototypes, seamlessly converting them into pilot production runs and then providing them with their full scale production requirements.

Exceed expectations through improvement and innovation

RD Rubber Technology Corporation understands the responsibility that goes with the parts we make. We specialize in the precision molding of custom rubber products and component parts for OEM's.

We serve vital industries where there can be no mistakes and where there is no margin for error. That's why the most important commodity that we offer our customers is Trust, because in some cases lives depend on the superiority of the parts we produce. We monitor quality from start to finish with proprietary systems and unparalleled focus. We make sure our quality exceeds the most stringent demands of our customers, and our equipment features the most reliable new technologies.

Markets Served

- Medical and Health Care
- Military Aerospace
- Electronics
- Food Processing
- Handling Equipment
- Other High Technology Industries

Responsive Customer Assistance

- Flexible Scheduling
- Complete Product Traceability
- Value Added Services including Specialized Packaging and Cleaning
