Olympus CX21

Brightfield Biological Microscope

The CX21 is an economically priced microscope that achieves a high standard of optical and mechanical quality.

The CX21's newly designed stand has a slim body design, allowing the user to operate the coarse and fine focus comfortably while keeping the hands on the desk.

Features & Benefits:

- Easy to use & dependable
- Highly rigid frame and easy-to-use design offer great reliability and long term durability
- Conveniently placed controls and a slim base make for comfortable viewing and efficient adjustments
- A plano concave mirror or brightfield observation
- An opening in the arm of the frame allows viewing the specimen stage in situations that require the frame to be placed backwards, so the mirror can capture light when emanating from in front of the user
- Halogen Light Source

Olympus CX31

Brightfield Biological Microscope

The Olympus CH biological microscopes, which have gained an outstanding worldwide reputation, now give rise to the new CX31 with USI infinity optics. The Universal Infinity System optics are the same well-known and advanced optical system featured in the highest quality Olympus Microscopes. Evolved from Olympus' best selling CH series, the new CX models improve all around performance and offer even greater efficiency.

- Newly-developed infinity corrected Plan C Achromat objectives offer exceptional flatness producing sharp, clear images right up the edge of the field of view (4x, 10x, 40x, 100x oil)
- Anti-fungus treatment helps protect optical parts even in high humidity regions
- Inward-facing, quadruple (CX31), or quintuple (CX41) revolving nosepiece improves access and makes for quick, easy slide changes
- Fixed Abbe condenser N.A. 1.25, centerable and focusable for Köhler illumination
- A 6V/30W halogen bulb provides ample illumination for any observation
- Ergonomically designed frame with low positioned coarse and fine focusing controls, analyzer slot for linear polarized light (CX41 only), and convenient handgrips at the front and back for transportation; integrated field stop
- Built in left or right hand stage with rackless design (CX31 right hand only), low positioned X,Y controls with ergogrips to facilitate operation

Olympus CX21 Phase Contrast Microscope

The CX21 is an economically priced microscope that achieves a high standard of optical and mechanical quality.

The CX21's newly designed stand has a slim body design, allowing the user to operate the coarse and fine focus comfortably while keeping the hands on the desk.

Olympus CX21 Phase Contrast Microscope newly developed objectives (exclusive for the CX21), provide sharp, high contrast images.

The CX21 comes complete with 4X & 10X brightfield objectives, 40X phase objective, phase contrast insert, Walton-Beckett graticule, green filter, 1.25 ABBE condenser, and 10x20 wide angle eye pieces.

Features & Benefits:

- Easy to use & dependable
- Highly rigid frame and easy-to-use design offer great reliability and long term durability
- Conveniently placed controls and a slim base make for comfortable viewing and efficient adjustments
- A plano concave mirror or brightfield observation
- An opening in the arm of the frame allows viewing the specimen stage in situations that require the frame to be placed backwards, so the mirror can capture light when emanating from in front of the user
- Halogen Light Source

Olympus CX31 Phase Contrast Microscope

400108

Olympus CX31 Phase Contrast Microscope newly developed objectives (exclusive for the CX31), provide sharp, high contrast images.

The CX31 comes complete with 4X & 10X brightfield objectives, 40X phase objective, phase contrast insert, Walton-Beckett graticule, green filter, 1.25 ABBE condenser, and 10x20 wide angle eye pieces.

- Anti-fungus treatment helps protect optical parts even in high humidity regions
- Inward-facing, quadruple (CX31), or quintuple (CX41) revolving nosepiece improves access and makes for quick, easy slide changes
- Fixed Abbe condenser N.A. 1.25, centerable and focusable for Köhler illumination
- A 6V/30W halogen bulb provides ample illumination for any observation
- Ergonomically designed frame with low positioned coarse and fine focusing controls, analyzer slot for linear polarized light (CX41 only), and convenient handgrips at the front and back for transportation; integrated field stop
