PRODUCT CATEGORY INDEX

AGRICULTURAL FOAM ■ CONCENTRATE	3
ANTI-FOAM ■ AGRICULTURAL FOAM BUSTER	3
CHEMICAL TANK CLEANER ■ REMOVES & NEUTRALIZES RESIDUES	3
CHEMICAL TANK CLEANER CONCENTRATE ■ (2X6=55)	3
DUST CONTROL ■ ELIMINATES DUST	3
DUST CONTROL CONCENTRATE ■ (2X6=55)	3
DUST ELIMINATOR ■ STOPS DUST KICK UP	3
EQUIPMENT BRIGHTENER ■ REMOVES SPRAYING RESIDUES	4
EQUIPMENT CLEANER ■ CONCENTRATED CLEANER	4
EQUIPMENT COATING ■ NON-STICK PROTECTIVE SHIELD	4
FOAM MARKER ■ LONG LASTING THICK FOAM	4
FOAM MARKER DYES ■ BRIGHT COLOR ADDITIVE	4
FOAM TANK ANTI-FREEZE ■ PREVENTS FREEZING OF SOLUTION	4
GLYPHO KILL CONCENTRATE ■ SAME AS ROUNDUP	4
GLYPHO KILL RTU ■ READY TO USE ROUNDUP	5
GRANULAR WEED KILLER ■ SPRAKIL SK-13	5
ICE BEATER ■ SNOW AND ICE MELTER	5
ICE MELTER ■ GENERATES EXOTHERMIC HEAT	5
LAWN TREATMENT ■ ONE STEP TO GREENER LAWNS	5
LIQUID FERTILIZER ■ PROMOTES LAWN GROWTH	5
LIQUID ICE MELTER ■ LEAVES NO RESIDUE	5
NAVIGATION FOAM ■ EXTREME TEMPERATURES	6
NITROGEN FERTILIZER ■ IMMEDIATE GREENING	6
pH DOWN LIQUID ■ NEUTRALIZES EXCESS ALKALINITY	6
pH UP LIQUID ■ NEUTRALIZES EXCESS ACIDITY	6
SELECTIVE HERBICIDE ■ KILLS BROAD LEAF WEEDS	6
SNOW AND ICE MELT ■ 20% CALCIUM CHLORIDE	6
SOIL CONDITIONER ■ LOOSENS COMPACTED SOIL	6
SOIL CONDITIONER CONCENTRATE ■ (1X6=55)	7
SOIL STERILANT ■ NON-SELECTIVE HERBICIDE	7
SPRAY ADJUVANT ■ CAUSES SPRAY TO STICK	7
SPRAY TANK CLEANER ■ 1 LB CLEANS 100 GALLON TANK	7
TANK PROTECTOR ■ METAL CORROSION INHIBITOR	7
WEED KILLER ■ WATER SOLUBLE MIX 10:1	7
WEED KILLER SPRAY AEROSOL ■ NON-SELECTIVE STERILANT	7

AGRICULTURAL FOAM ■ CONCENTRATE

Use this product in either either low- or high-pressure foam-generating equipment to mark the edges of pesticide, herbicide, and fertilizer spray swaths. This marking reduces overlapping and skipping, to provide more uniform application of all pesticides and fertilizers. When used at the recommended dilution ratio of 80:1, Agricultural Foam produces a long-lasting, shaving cream-thick, highly visible, white foam, with exceptional stability.

ANTI-FOAM ■ AGRICULTURAL FOAM BUSTER

Anti-Foam was developed as a foam prevention additive in potato processing and in herbicide, pesticide and fertilizer spray tanks. Foam is created by the constant sloshing of the adjuvants, herbicides, pesticides and fertilizers inside spray tanks. Excessive foam can cause improper dilutions of expensive chemicals, improper spraying patterns and improper chemical calibrations.

CHEMICAL TANK CLEANER ■ REMOVES & NEUTRALIZES RESIDUES

Chemical Tank Cleaner is a water-soluble, non-toxic, non-flammable, non-corrosive, 100% biodegradable formula, developed exclusively to clean and neutralize the inside of agricultural spraying tanks. It easily removes any herbicide, pesticide, fertilizer and adjuvant residues left in the spray tank, to prevent cross-contamination.

CHEMICAL TANK CLEANER CONCENTRATE ■ (2X6=55)

Chemical Tank Cleaner Concentrate was developed to save money and shipping costs for customers. By eliminating the water from the original formulation of a 55-gallon drum of Chemical Tank Cleaner, 12 gallons (2 buckets) of active ingredients remain. These 2 super concentrated buckets, when mixed with 43 gallons of water, make a 55-gallon drum of regular strength Chemical Tank Cleaner, which should then be further diluted up to 100:1.

DUST CONTROL ■ ELIMINATES DUST

Meet government safety requirements by using this product to eliminate dust in mines, thereby reducing the danger of explosions. Dust Control prevents coal from dusting in storage and makes dirt roads around mines and quarries more compact to minimize dust. Apply to roadbeds before laying concrete or blacktop to compact surface. It also prevents dry waves in asphalt pavement. This product is safer on the environment than lime and water treatments. Extremely concentrated. Dilute 1000:1 in dust control water tanks.

DUST CONTROL CONCENTRATE ■ (2X6=55)

This product was developed to save money and shipping costs for customers. A 55-gallon drum of original Dust Control contains surfactants, detergents and emulsifiers; it also contains 78% water. By eliminating the water from the formulation, 12 gallons (2 buckets) of active ingredients remain. These 2 super concentrated buckets, when mixed with 43 gallons of water, make a 55-gallon drum of regular strength Dust Control.

DUST ELIMINATOR ■ STOPS DUST KICK UP

Heavily traveled dirt road surfaces require repeated watering to control dust. This is time-consuming and expensive and not always effective. Dust Eliminator works by continually absorbing moisture from the air, trapping it and locking it into dirt surfaces. This unique reaction stabilizes dirt surface, and in turn, suppresses dust. The result is a hard-packed, dust-free, dirt road. Dust Eliminator is a long-term solution, controlling dust for an extended period of time.

EQUIPMENT BRIGHTENER ■ REMOVES SPRAYING RESIDUES

Equipment Brightener cleans and brightens all types of agricultural equipment. It is especially effective for the complete removal of pesticides, herbicides, fertilizers and adjuvant residues from floaters, sprayer tanks and all other agricultural equipment. It removes thick chemical deposits from inside sprayer tanks and also exterior aluminum and metal surfaces. This product is excellent for removing oxidation and corrosion from trailers and transportation equipment.

EQUIPMENT CLEANER ■ CONCENTRATED CLEANER

Equipment Cleaner provides effective and complete removal of dirt, oil, exhaust stains, pesticide, fertilizer and spray adjuvants residues from all types of agricultural equipment. This water-based product is formulated with environmentally safe ingredients. It is non-flammable, non-toxic, water-soluble, phosphate-free and is 100% biodegradable. Equipment Cleaner contains a special rust inhibitor to retard corrosion of metals.

EQUIPMENT COATING ■ NON-STICK PROTECTIVE SHIELD

Equipment Coating is an innovative product, developed specifically for the agricultural industry. This formulation of silicone emulsions, provides a slick, non-stick, protective coating for agricultural equipment. It can be applied to all types of metal surfaces, storage tanks and floaters, to prevent herbicides, pesticides, fertilizers and adjuvants from adhering. It also provides equipment and vehicles with a high-gloss, protective shine.

FOAM MARKER ■ LONG LASTING THICK FOAM

Use of this product helps to eliminate overlapping and skipping and provides more uniform application of all pesticides and fertilizers. Foam Marker is designed for use in either low or high pressure foam generating equipment. Foam Marker is very concentrated at 120:1 dilution and is effective in extreme hot and cold field temperatures.

FOAM MARKER DYES ■ BRIGHT COLOR ADDITIVE

This product is a highly concentrated, liquid dye developed to add vibrant color to foam marking solutions for low light conditions. These bright colors enhance foam marker visibility during pre-dawn or early morning hours, when weather conditions are best. Foam Marker Dyes readily mix with water or other liquid solutions. Dyes are non-staining and harmless to vegetation. Available in blue, orange, yellow and red.

FOAM TANK ANTI-FREEZE ■ PREVENTS FREEZING OF SOLUTION

In temperatures well below 32° F, this product prevents freezing in the liquid tank containing Foam Marker. When used as directed, this anti-freeze will lower the freezing point of the tank solution, without affecting its performance. It also inhibits any condensation in the tanks, which prevents any possibility of water freezing.

GLYPHO KILL CONCENTRATE ■ SAME AS ROUNDUP

This product is a multipurpose, non-selective weed and grass killer. Glypho Kill completely kills the weed but does not sterilize the soil. The active ingredient, glyphosate, is absorbed systematically, by contact foliage, and is carried throughout the stems and roots of over 110 tough annual and perennial grasses and broad leaf plants for a complete kill... roots and all.

GLYPHO KILL RTU ■ READY TO USE ROUNDUP

This product is the RTU version of Glypho Kill Concentrate, which is a multipurpose, non-selective weed and grass killer. Glypho Kill completely kills the weed but does not sterilize the soil. The active ingredient, glyphosate, is absorbed systematically by contact foliage and is carried throughout the stems and roots of over 110 tough, annual and perennial grasses and broad leaf plants for complete kill... roots and all.

GRANULAR WEED KILLER ■ SPRAKIL SK-13

Granular Weed Killer is a non-selective herbicide for controlling a wide range of annual and perennial weeds and grasses. It is recommended only for non-cropland areas, such as railroad rights-of-way and industrial areas. 150 to 400-pound applications of SpraKil Sk-13 Granular per acre usually result in a non-productive soil condition for a period of a year or more. This granular product dissolves slowly to prevent leaching.

ICE BEATER ■ SNOW AND ICE MELTER

Ice Beater is a unique blend of ice melting agents, including exothermic pellets. These ingredients combine to produce a safe, efficient and cost-effective ice melting product, at temperatures ranging from 32° F. down to -5° F. Through a chemical reaction, the exothermic pellets give off heat, enabling this formulation to work faster than other sodium chloride based snow and ice melt product. Ice Beater is colored light blue for easy monitoring of application. Available in bags or containers of 10, 20, 50, 100, 500 and 2,000 pounds.

ICE MELTER ■ GENERATES EXOTHERMIC HEAT

This product has over 24 times the melting power of rock salt at 0° F. Tests conducted at 100% relative humidity and 0° F, proved this product melted an average of 205 grams of ice in just 15 minutes, compared to an average of 8.7 grams melted by rock salt. Ice Melter is the most powerful product available and is effective at melting ice down to -57° F. This product is completely harmless to grass, shrubs, trees, animals and rubber tires. It will not pit or discolor concrete walks or asphalt or leave a messy residue to be tracked indoors. Available in bags or containers of 50, 100, 500 and 2,000 pounds.

LAWN TREATMENT ■ ONE STEP TO GREENER LAWN

This product is an innovative, soil additive that conditions and loosens compacted soil while fertilizing. This soil penetrant, formulated with nitrogen fertilizer, infiltrates deep into the soil, building direct channels for water and nutrients to reach roots for more effective feeding of grass and plants. Nitrogen fertilizer (32-0-0) contains inorganic nitrogen for immediate growth and greening, and organic nitrogen for prolonged growth.

LIQUID FERTILIZER ■ PROMOTES LAWN GROWTH

This product is a balanced, concentrated liquid fertilizer, of which the basic elements are readily assimilated, promoting growth and producing healthy plants. Liquid Fertilizer contains inorganic nitrogen for immediate top growth, greening, and organic nitrogen for prolonged growth. It also contains phosphorous to promote adequate root development, and potassium for stalk formation and maturity.

LIQUID ICE MELTER ■ LEAVES NO RESIDUE

This product's amazing chemical action melts ice and snow faster than salt or calcium chloride products. It is effective at melting ice down to -25° F. Liquid Ice Melter prevents snow from sticking and ice from forming for hours. This liquid is easy to apply through a 2 or 3 gallon pump sprayer or other spray equipment. It will not break down or deteriorate in storage or in damp conditions. It is safe for shoes, rubber, asphalt, concrete, grass, wood, metal, and most painted surfaces.

NAVIGATION FOAM ■ EXTREME TEMPERATURES

This product has been designed for use in either low or high pressure foam generating equipment and produces a long-lasting, shaving cream-thick, highly-visible, white foam, with exceptional stability. Navigation Foam is extremely concentrated at 120:1 dilution and is effective in extremely hot and cold field temperatures.

NITROGEN FERTILIZER ■ IMMEDIATE GREENING

Nitrogen Fertilizer is a balanced, concentrated liquid fertilizer. The penetrating agents ensure quick absorption into the soil so nutrients are immediately available for root transmittance. It contains inorganic nitrogen for immediate top growth and greening, and organic nitrogen for prolonged growth. This fertilizer may be used in connection with water-miscible insecticides and also with Brody Chemical's Soil Conditioner.

pH DOWN LIQUID ■ NEUTRALIZES EXCESS ALKALINITY

This product neutralizes excessive alkalinity occasionally found in agricultural applications. High alkalinity causes excessive deterioration of expensive equipment and can diminish performance of agricultural chemicals. This product is an acidic, liquid solution that neutralizes any alkaline (high pH) spray product, making the spray more effective on crops and plants.

pH UP LIQUID ■ NEUTRALIZES EXCESS ACIDITY

This product neutralizes the acidic conditions sometimes found in agricultural applications. Excessive acid concentrations can hinder the performance of expensive herbicides, pesticides and fertilizers and also cause severe deterioration to spray equipment. This product is a high alkaline liquid that neutralizes any acidic (low pH) spray product, making the spray more effective on crops and plants.

SELECTIVE HERBICIDE ■ KILLS BROAD LEAF WEEDS

Selective Herbicide is a non-volatile, water-miscible concentrate containing 2,4-D. It is especially useful in the control of obnoxious, broad-leaved weeds in crops, lawns, golf courses and parks, along highways, vacant lots and similar areas, without injury to most grasses. This product is a growth hormone that accelerates the growth of broad-leaved weeds and kills the plant by over stimulation.

SNOW AND ICE MELT ■ 20% CALCIUM CHLORIDE

Snow and Ice Melt is a blend of sodium chloride (salt), calcium chloride (exothermic heat), magnesium chloride and sodium silicate (corrosion inhibitor). This product contains 20% calcium chloride, which produces exothermic heat, enabling the melting of snow and ice down to -20° F. When applied as directed, this non-tracking product reduces damage to concrete and stone surfaces and leaves no residue. Special inhibitors and anti-caking agents ensure product is free flowing for uniform spreading. Snow and Ice Melt is colored light blue for easy monitoring of application. Available in bags or containers of 50, 100, 500 and 2,000 pounds.

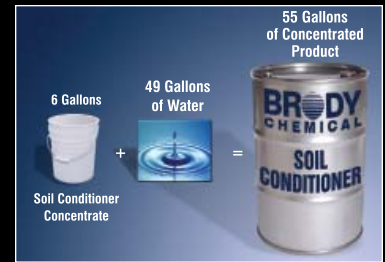

SOIL CONDITIONER ■ LOOSENS COMPACTED SOIL

This product is an innovative, soil additive that breaks down the surface tension of dry soil, so water penetrates quickly, down into the root system. Soil Conditioner is most effective in the top 20 inches of the soil, by keeping moisture in the root zone of the plants and turf. Using this product ensures penetration of water quickly and efficiently down to the root zone, keeping grass greener while using up to 75% less water.

SOIL CONDITIONER CONCENTRATE ■ (1X6=55)

Soil Conditioner Concentrate was developed to save money and shipping costs for customers. By eliminating the water from the original formulation of a 55-gallon drum of Soil Conditioner, 6 gallons (1 bucket) of active ingredients remain. This super concentrated bucket, when mixed with 49 gallons of water, make a 55-gallon drum of regular strength Soil Conditioner.

SOIL STERILANT ■ NON-SELECTIVE HERBICIDE

Soil Sterilant is a non-selective herbicide intended for use after dilution with water, or appropriate oil. For best results, apply to bare ground or when weed growth is just starting. Weeds taller than 4-5 inches should be hoed or a second application may be necessary. Use for vegetation control in driveways, brick walks, paths, patios, parking areas, play areas, rock gardens, along fences, curbs, and around buildings, etc.

SPRAY ADJUVANT ■ CAUSES SPRAY TO STICK

Spray Adjuvant is an additive for liquid mixtures of herbicides, pesticides and fertilizers. It causes spray solutions to spread across the entire leaf or plant surface and then cling, resisting wash off by rain or sprinklers. This product is a blend of low foaming surfactants that performs better than other non-ionic surfactants commonly being used. Spray Adjuvant is 100% biodegradable, safe on all types of crops and very concentrated (dilutes up to 3200:1).

SPRAY TANK CLEANER ■ 1 LB CLEANS 100 GALLON TANK

Spray Tank Cleaner is an excellent all-purpose, cleaner compound used for flushing spray tanks and booms. When changing from one chemical to another, Spray Tank Cleaner removes any residue from the spray equipment preventing cross-contamination. Prior to storage of equipment, this product removes and inhibits rust, neutralizes acids including 2,4-D and leaves a protective coating. Spray Tank Cleaner is totally safe to use and 100% biodegradable.

TANK PROTECTOR ■ METAL CORROSION INHIBITOR

This product was developed to inhibit rust and corrosion formation on all types of metal fertilizer and water tanks. It is effective and recommended for use on all metals such as steel, iron, galvanized metal, brass, bronze, copper and alloys. Tank Protector does not leave any toxic residue. It is colorless and tasteless, making it safe to use in potable water tanks without the need of rinsing.

WEED KILLER ■ WATER SOLUBLE MIX 10:1

This product is a systemic, non-selective, water-based, soil sterilant and herbicide. The active ingredient in this product, Bromacil, acts as a photosynthesis inhibitor and remains in the soil for a full growing season, thereby prohibiting the growth of weeds and other undesirable foliage.

WEED KILLER SPRAY AEROSOL ■ NON-SELECTIVE STERILANT

This product is a non-selective, weed killer and complete soil sterilant conveniently packaged in an aerosol can for spot applications. Use this product to kill weeds and grass in sidewalks, driveways, around edges of buildings, etc. Easy-to-use, inverted valve sprays a pinpoint stream for controlled application. It is fast acting and residual in its herbicidal property. For best results, apply in the late spring; after most weeds have emerged.

WELCOME TO BRODY CHEMICAL

Brody Chemical began in Salt Lake City, Utah in 1975. Since then, it has grown from a small local company to one that provides superior products and service to over half of the United States. Brody's success is attributed to its commitment to create innovative and highly effective products — manufactured under strict quality control standards, a responsive technical support team, and a professional, well-trained, service-driven sales force. Brody Chemical's comprehensive product line boasts over 600 different formulations of sanitation, institutional, industrial and maintenance chemicals for professional use. Reducing the risks associated with chemical usage and disposal, avoiding depletion of the Earth's natural resources, and enhancing the safety and work environment for clients are core values of Brody Chemical.

ABOUT BRODY CHEMICAL

Brody Chemical sells and provides service to over 50,000 customers in a variety of industries including manufacturing, industrial, mining, automotive, institutional, hospitality, trucking, food and beverage, agricultural, and medical. Brody Chemical's sales representatives are trained to offer technical assistance and recommendations in selecting chemical solutions and cleaning processes that best meet the needs of clients.

6125 WEST DOUBLE EAGLE CIRCLE, SALT LAKE CITY, UTAH 84118
