

# Portable RO Systems for Acute Settings

Portable Reverse Osmosis systems appropriate for all acute settings including bedside, ICU, and isolation rooms.

During this critical time, AmeriWater understands the need for reliable portable high purity water systems delivered fast. That's why we have a dedicated team maintaining a constant inventory of our reverse osmosis treatment systems for hemodialysis.

Our systems are designed for ease of use, quiet operation, and superior reliability. These units have everything you need to transform your tap water into product water for dialysis for up to two patients. The compact size and easy maneuverability make AmeriWater's portable ROs perfect for acute isolation treatment rooms. Contact our experienced water purification professionals today for a free consultation on your facility's needs.

**THE CENTURION BY  
AMERIWATER**

The Centurion by AmeriWater is a sleek, compact Portable Heat Disinfect Reverse Osmosis System, which includes a .005 micron ultra-filter that enhances the microbiological quality of the water.

- Maximum flow rate of 1500 ml/minute
- Permeate specification exceeds recognized dialysis water treatment standards
- State of the art, touch screen display for easy control

**PORTABLE SINGLE  
PATIENT (MROS)**

The unique compact design of the MROS is a complete package. All pretreatment, which includes dual carbon filters, sediment filter, and anti-scalant for hardness reduction, is located inside the cabinet.

- The entire device conforms to IEC UL standard 60601-1
- Plug-n-play controller provides easier access to program changes and disinfect mode

**PORTABLE, UP TO TWO  
PATIENTS (MRO1)**

AmeriWater's MR01 systems are designed for ease of use, quiet operation, and superior reliability. The compact size and easy maneuverability makes the MRO1 perfect for acute settings.

- Quick and easy onboard disinfection with the push of a keypad
- Large membrane has the capacity to feed two dialysis machines, even on cold water
