SAINT-GOBAIN

If you're looking for shingles with staying power, your search stops here.

When it comes to weathering the elements, XT™ 30 (Impact Resistant), XT™ 25, and CT™ 20 are at the top of their class. Built on a tough fiber glass base, each shingle is a little heavier than the next with added warranty and wind protection.

New, impact resistance XT 30 is a stopper in more ways than one. Proven to withstand the force of a 2" steel ball dropped from a height of 20', it is one beauty that does double-duty.

If you want a three-tab shingle that has quality and price nailed down, both XT 25 and CT 20 offer an intelligent balance of strength, reliability and value.

All products conform to the following specifications:

- Fiber glass composition
- UL Class A fire resistance
- UL certified to meet ASTM D3462
- UL certified to meet ASTM D3018 Type 1
- Conforms to CSA standard A123.5-98

XT 30 impact resistant shingles meet UL 2218 Class 4 rating for impact resistance.

For U.S. building code compliance, see product specification sheets.
