Founded in 2009, **Heat Transfer Tubular Products** has grown to become a modern distributor, global trading company, and high-quality fabricator of tubular products for heat exchanger, boiler, feedwater heater, economizer, and condenser tube applications.

As a **distributor**, our state-of-the-art facility in Conroe, Texas contains a warehouse that is stocked with a variety of common sizes and alloys to support our customers' immediate and near term delivery requirements.

Our **fabrication** capabilities include **u-bending** both ferrous and non-ferrous tubing. We also have a large volume tube **finning** operation in our Texas plant and we continue to service an ever larger customer base by providing a competitive product with outstanding customer service.

HTT Products manufactures **custom tube ferrules** and **twisted tape turbulators** in our fabrication shop.

On our **trading** side, HTT Products has developed and audited a global network of tube manufacturers. Our supply base extends around the world to provide our customers with globally competitive pricing and lead times, regardless of the material type. Our partner mills operate in Europe, South America, Asia, and North America.

Call us today and let us quote your next project.

We appreciate your consideration of Heat Transfer Tubular Products.
