

## UPS Systems

Uninterrupted power when you need it

### Product List

DRS Pivotal Power's Uninterruptible Power Supply (UPS) systems deliver power when you most need it, where you most need it. Why? Our systems are built on more than two decades of power conversion experience and include our proven and advanced DSP-controlled algorithms. So you can trust our UPS systems to deliver true sign wave AC or clean DC output in any critical situation:

- With power factor-corrected, wide-input power ranges (frequency, voltage configurations or DC voltage levels), our systems provide you with clean, dependable AC or DC power anywhere. You can use them on ships, military vehicles, industrial vehicles or harsh land-based environments.
- Our Army Ground Mobile systems are fully qualified to:
  - MIL-STD-810
  - MIL-STD-461
  - MIL-STD-167
  - MIL-STD-901
  - MIL-STD-740
  - MIL-P-15736
  - CHS-3 V2 complaint
  - MIL-P-15736/5
- Our Naval systems are fully qualified to:
  - MIL-STD-810
  - QSTAG-307
  - MIL-STD-1275
  - Mil-C-24095B
- Our Aerospace systems are fully qualified to:
  - MIL-STD-704
  - MIL-STD-785
  - MIL-STD-810
  - MIL-STD-882
  - MIL-STD-965
  - MIL-STD-1472

Whatever your power conversion needs, DRS Pivotal Power has it covered.

## UPS System Products

### Filter list by Market:

| Product Name        | Description  |                                     |
|---------------------|--|-------------------------------------|
| <b>6 kVA AC UPS</b> | An uninterruptible power supply that continuously provides conditioned output power for critical naval shipboard applications. | <a href="#">View Product Detail</a> |

|                                     |  |                                     |
|-------------------------------------|--|-------------------------------------|
| <b>5kW UPS</b>                      | An uninterruptible power supply that continuously provides precise output power for critical naval shipboard applications.               | <a href="#">View Product Detail</a> |
| <b>3 kVA AC UPS</b>                 | An uninterruptible power supply that continuously provides conditioned output power for critical naval shipboard applications.           | <a href="#">View Product Detail</a> |
| <b>3000TRLP</b>                     | A rugged UPS engineered for worldwide deployment and operation   | <a href="#">View Product Detail</a> |
| <b>2000W/2500VA Dual Input UPS</b>  | An uninterruptible power supply that continuously provides conditioned output power for demanding ground mobile applications.            | <a href="#">View Product Detail</a> |
| <b>2.4 KW DC UPS</b>                | An uninterruptible power supply that continuously provides conditioned output power for critical naval shipboard applications.           | <a href="#">View Product Detail</a> |
| <b>Battery Module</b>               | Extended runtime battery module for use with 1000TR-III, 1500TR-III, or 2000TR-III.  | <a href="#">View Product Detail</a> |
| <b>2 kVA AC UPS</b>                 | An uninterruptible power supply that continuously provides conditioned output power for critical naval shipboard applications.           | <a href="#">View Product Detail</a> |
| <b>2kW DC UPS</b>                   | An uninterruptible power supply that continuously provides precise output power for critical naval shipboard applications.               | <a href="#">View Product Detail</a> |
| <b>2kVA AC UPS</b>                  | An uninterruptible power supply that continuously provides precise output power for critical naval shipboard applications.               | <a href="#">View Product Detail</a> |
| <b>1000 W/1250VA Dual Input UPS</b> | An uninterruptible power supply that continuously provides conditioned output power for demanding ground mobile applications.            | <a href="#">View Product Detail</a> |
| <b>Dual Input/Output UPS</b>        | The Dual Input/Output true on line uninterruptible power supply (UPS) delivering clean conditioned power for ground mobile applications. | <a href="#">View Product Detail</a> |
| <b>1500VA / 1050W UPS</b>           | The 1500TRM is a 1500VA/ 1050W true on-line global UPS in a 2U configuration.  | <a href="#">View Product Detail</a> |
| <b>1 kVA AC UPS</b>                 | An uninterruptible power supply that continuously provides conditioned   | <a href="#">View Product Detail</a> |

|                                     |   |                                     |
|-------------------------------------|---|-------------------------------------|
|                                     | output power for critical naval shipboard applications.   |                                     |
| <b>1kW DC Rectifier</b>             | An uninterruptible power supply that continuously provides conditioned output power for critical naval shipboard applications.  | <a href="#">View Product Detail</a> |
| <b>1kVA AC/DC UPS</b>               | An uninterruptible power supply that continuously provides precise AC and DC output power for critical naval shipboard applications.  | <a href="#">View Product Detail</a> |
| <b>1kW DC UPS</b>                   | An uninterruptible power supply that continuously provides precise output power for critical naval shipboard applications.  | <a href="#">View Product Detail</a> |
| <b>0.8 kW DC UPS</b>                | An uninterruptible power supply that continuously provides conditioned output power for critical naval shipboard applications.  | <a href="#">View Product Detail</a> |
| <b>DRC1150BRX</b>                   | Global input power capability of the Briefcase Series true on-line Uninterruptible Power Supply (UPS) enables transportable computer and communications systems to be used worldwide. 1150VA / 800W | <a href="#">View Product Detail</a> |
| <b>700W UPS</b>                     | The 1000TRM is a 700W global UPS with internal battery.   | <a href="#">View Product Detail</a> |
| <b>490W UPS</b>                     | The 700TRM is a 490W global UPS with internal battery.  | <a href="#">View Product Detail</a> |
| <b>3000VA / 2100W UPS</b>           | For conditioned, true on-line regulated sinewave power and unmatched power protection, specify the 3000TR-IV Global UPS (uninterruptible power supply) System from UPSI.                            | <a href="#">View Product Detail</a> |
| <b>Intelligent Voltage Selector</b> | The IVS1500 automatically senses and converts 85 - 264VAC to 120VAC.  | <a href="#">View Product Detail</a> |
| <b>2000VA / 1400W UPS</b>           | Engineered for worldwide deployment and operation, the rugged TR-IV true on-line uninterruptible power supply (UPS) provides unmatched power protection in the most adverse power environments.     | <a href="#">View Product Detail</a> |
| <b>1500VA / 1050W UPS</b>           | Engineered for worldwide deployment and operation, the rugged TR-IV true on-line uninterruptible power supply (UPS) provides unmatched power protection in the most adverse power                   | <a href="#">View Product Detail</a> |

|                   |   |                                     |
|-------------------|---|-------------------------------------|
