**INNOVATIVE
RELIABLE
RESPONSIVE**

DISCOVER FAST, FLEXIBLE AND RELIABLE PACKAGING SOLUTIONS.

Mold-Rite Plastics is a leading provider of high-quality, rigid-plastic packaging components used every day by millions of consumers around the globe. We are the only plastic-closure and jar manufacturer that delivers the unique combination of innovative design solutions and quality products at industry-leading customer-experience levels. From fast-order shipping of a wide range of stock components to developing custom product solutions with our in-house innovation team, Mold-Rite is a trusted supplier. We are passionate about partnering with distributors and manufacturers who understand that closures are a small but important part of how people experience their brands.

Mold-Rite has the most complete collection of child resistant closures on the market, as well as a broad array of jars, continuous thread closures, dispensing closures and specialty caps. And, our in-house design and tooling capabilities allow us to quickly customize solutions. Since 1976, Mold-Rite has served a diverse range of markets including:

- Nutraceutical
- Pharmaceutical
- Food and Beverage
- Personal Care
- Household Chemicals
- Automotive

What started with six full-time employees and five used injection-molding machines has grown into a full-scale, environmentally responsible manufacturing operation with molding, lining and decorating capabilities. With the recent acquisitions of Weatherchem Corporation and Stull Technologies, Mold-Rite now has a broadened footprint that further enhances our ability to deliver.

Innovative. Reliable. Responsive. It's all part of our package.

Our Promise

Mold-Rite promises an unmatched experience in delivery performance, order flexibility and lead times. And, we deliver. It is our daily commitment to provide exceptional products and services that help our customers and distribution partners realize their value potential. We are dedicated to making you more competitive and more profitable.

Sustainability is our Responsibility

Mold-Rite takes the obligation to be a sustainable entity very seriously. As a manufacturer in the plastic packaging industry, we recognize the need to be socially responsible. Our sustainability initiatives start with our recyclable products and permeate our processes, energy consumption, design, development and waste stream. In addition to these efforts, Mold-Rite can now incorporate post-consumer recycled (PCR) resin into select closures.

Materials

CPP – CoPoly/Polypropylene

LDPE – Low-density Polyethylene

MDPE – Medium-density Polyethylene

PP – Polypropylene

PS – Polystyrene

FAST

Responsiveness you can trust.

To help deliver the quick turnaround you need, Mold-Rite keeps our Plattsburgh, NY, warehouse stocked with a wide range of high-demand products. Items available for immediate shipment include:

- Continuous thread closures
- Child resistant closures
- Jars

What's more, we meticulously manage and monitor our production schedules to ensure that our custom parts are produced with lead times that are at or below industry averages. For parts that require the creation of unique molds, Mold-Rite's in-house tool-building service significantly reduces production time.

We move our products fast – so you can move yours.

CONTINUOUS THREAD

With a variety of finishes from smooth or matte tops to ribbed sides, the continuous thread closure options and applications are endless. Threaded to fit precisely to your container and seal tightly, these versatile closures are easily customizable with embossing, debossing and decorating options.

Ideal markets: Pharmaceuticals, nutraceuticals, personal care, household chemicals, food, craft and hobby

Stocking: White closures in stock and ready to ship, black available on select options

CHILD RESISTANT

In the highly regulated pharmaceutical market, reliable, child resistant closures are essential. Mold-Rite child resistant closures safely secure your product while ensuring compliance with rigorous protocol testing to meet Consumer Product Safety Commission (CPSC) standards. Our many designs offer just the right option for safe product storage and include text, debossed, embossed, and pictorial selections.

Ideal markets: Pharmaceuticals, nutraceuticals, household chemicals and automotive

Stocking: White and black closures in stock and ready to ship

HINGED DISPENSING

Dispensing vitamins and supplements has never been easier. Utilizing hinged dispensing closures specifically designed for pills, the NutraFlapper®, NutraGen II® and Hinge Guard closures offer one-handed, senior-friendly, easy opening and controlled pouring. This ensures there are no contaminated medicines put back into the container. All of these hinged dispensing options offer a full pour orifice and smooth skirt.

Ideal markets: Nutraceuticals, pharmaceuticals

HINGED DUAL FLAP DISPENSING

Shake it. Pour it. Spoon it. With the versatility of the Flapper® dual-flap closure, consumers can dispense just the right amount of a product without ever removing a cap. The contemporary style provides shelf impact while ensuring product freshness and functionality. The variety of dispensing combinations available – Directional Pour, Pour, Sift – make this a versatile closure for many dry products.

Ideal markets: Spice and seasonings, confectionery and sweeteners, grated cheese, nuts and snacks, personal care, pet food and chemicals

HINGED LARGE FORMAT DISPENSING

The bulky size of large-diameter containers makes dispensing difficult, yet easy dispensing is a must in any application. Mold-Rite's large-format closures, including the Flapper® and MegaFlap®, allow easy access to products and control when pouring. The new MegaFlap offers a full open flap and provides a scoop-retention feature to hold a measuring scoop. The 110 mm Flapper offers a lightweight closure with both slotted and pourable orifices.

Ideal markets: Nutritional powders, snacks, lawn care, pet foods and treats, dry household chemicals and ice melt

INNOVATIVE

Fresh ideas. Results-driven collaboration.

With the acquisitions of Weatherchem Corporation and Stull Technologies, Mold-Rite combines the innovation, technology and resources of three proven suppliers. We deliver award-winning, high-quality packaging solutions powered by imagination and engineering expertise.

Mold-Rite utilizes a unique collaborative approach to optimize product innovations, bringing to market exciting new products such as the MegaFlap®, a user-friendly flap-style closure with a scoop-retention feature. We conduct voice of the customer interviews to ensure that real customer input goes into each design. Our engineers are involved in the innovation process every step of the way – from initial drawings to the production floor – to make sure every closure meets specification.

STRAP CAPS

Whether you want your package sealed securely to keep it from leaking or to keep contaminants from getting into your liquid, strap caps are an ideal solution. Mold-Rite offers many unique designs and orifice sizes to securely store a variety of liquids from charcoal lighter to saline solution. Where applicable, these closures conform to all child resistant protocol guidelines in accordance with the Consumer Product Safety Commission (CPSC).

Ideal markets: Household chemical, industrial, health and beauty, personal care and charcoal lighter

PUSH/PULL

The easy-open push/pull closures help consumers prevent messes with clean, directional pour dispensing. This closure type includes a back-off resistor bead that helps prevent accidental opening of products. The cover cap shape allows easy gripping during opening and closing. To use, consumers simply pull up on the spout to open and push downwards until the bead is showing to close.

Ideal markets: Personal care, household chemical and automotive

DISPENSING PLUGS

Mold-Rite's dispensing plugs, also known as orifice reducers, are available in a variety of sizes to accommodate multiple viscosities. They can be used in conjunction with a CT or cover cap. Dispensing plugs can be inserted in multiple neck finishes and allow for controlled dispensing of liquid products.

Our latest innovation, the AccuDose™ Liner, is a tamper-evident liner that provides controlled dispensing for pills or other small pieces contained in bottles. The liner's shape is easily adaptable to any product size with simple orifice size and shape adjustments, and requires no packaging changes. The AccuDose Liner is compatible with all container and closure designs.

Ideal markets: Pharmaceutical, nutraceutical, automotive and household chemical

TWIST OPEN – TWIST CLOSE

The distinct streamlined shape of Mold-Rite's twist open – twist close dispensing closures combined with fresh new color options gives any package instant shelf appeal. With smooth, easy opening and closing and pinpoint dispensing accuracy, twist open – twist close closures have a clearly visible sealing indicator that prevents product leakage, drying and clogging. Closures are available in a variety of orifice sizes, sealing types, diameters and finishes.

Ideal markets: Hair care applicators, hobby and craft, food condiments, pharmaceuticals, OTC ointments and creams and pet applications

OPEN SPOUT, SNIP TIP

Our open spout and snip tip closures offer consumers controlled, directional dispensing for a wide range of products.

Snip tip closures give consumers control over how large or small they want their opening to be. Larger orifices result from snipping the tip close to the base while smaller openings result from snipping closer to the tip. Ideal for one-time-use products, snip tips are perfect for the personal care and chemical markets.

Unlike our snip tips, open spout closures do not require any snipping. Combined with a cover cap, our open spout closures have a large range of orifice sizes to meet your dispensing needs.

Ideal markets: Pharmaceutical, nutraceutical, food, personal care, automotive and hobby

RELIABLE

Invested in people, equipment, processes and technology.

Committed to quality, Mold-Rite is continually investing in what it takes to deliver the best possible package – every time. That means:

- Nurturing leading design and engineering experts
- Maintaining and acquiring state-of-the-art equipment to ensure production functionality
- Implementing new technologies including innovative robotic stacking machines

Mold-Rite regularly participates in rigorous plant audits required by our customers. We proudly manufacture in cGMP facilities and hold multiple pharma and food certifications such as ISO and Safe Quality Food (SQF), which are recognized under the Global Food Safety Initiative, and maintain Drug Master Files as applicable. When you do business with Mold-Rite, you can trust that our industry experts are using the best equipment and processes to produce the best possible results.

JARS & VIALS

With sizes as small as 1/4 ounce and as large as 40 ounces in a variety of styles and materials, Mold-Rite has a jar to meet virtually any need. Choose from our selection of Polypropylene and Polystyrene jars that can easily and efficiently be decorated to enhance your brand on the shelf. All jars and vials are produced in our Plattsburg manufacturing facility.

Ideal markets: Food, personal care, OTC pharmaceutical, industrial, chemical and much more

Material: Polypropylene, Polystyrene (*)

FLEXIBLE

Any product. Any color. Any liner. Any application.

At Mold-Rite, it is our practice to maintain open capacity on our presses, allowing us to respond with fast, high-quality solutions whenever you need us. No order is too large or too small for our team, but every order is a priority.

Mold-Rite brings market-leading flexibility to every job. We can repurpose existing molds and prototypes to fit your requirements, or we can design and engineer custom products seamlessly. Our in-house design and tooling capabilities allow us to develop custom products with shorter lead times. Give us your exact requirements, and we'll give you a solution.

LINERS

Liners are an important part of a complete package and assure that a container's contents are secure. Whether you need a liner for freshness and protection, to prevent leaks, allow product venting, or to provide tamper evidence, our complete selection of liners will meet your packaging needs. From foods and pharmaceuticals to cosmetics and household chemicals, we can meet any industry requirement. Listed below are our stock and standard liners. Additional options available. Please call for more information.

FUNCTION

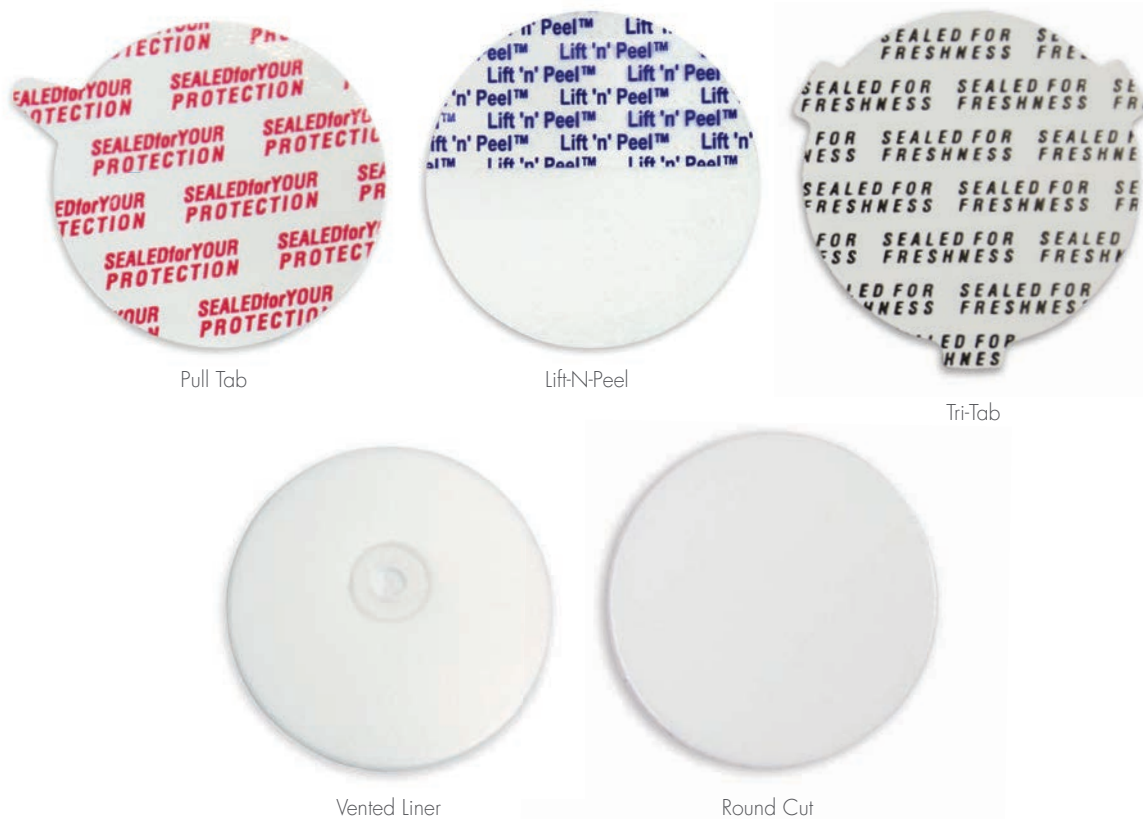

- WS – Welded Seal
- CP – Clean Peel
- TR – Traditional/Gasket
- EE – Easy Entry
- HB – High Barrier
- PRS – Pressure Sensitive

CONTAINER MATERIALS

- PVC – Polyvinyl Chloride
- PET – Polyester
- PP – Polypropylene
- PS – Polystyrene
- PE – Polyethylene
- UV – Universal
- GL – Glass

IMPRINT

- SFF – Sealed for Freshness
- SFYP – Sealed for Your Protection
- LNP – Lift-N-Peel
- QS – Quality Seal
- R – Red
- B – Black
- W – White
- G – Green

DECORATE IT!

Quick, easy printing options.

As a leading manufacturer, Mold-Rite provides superior design and engineering services to accommodate a wide range of molding and lining needs. With nearly 20 state-of-the-art decorating machines, we truly are your one-stop shop. Maximize your brand with our printing capabilities, including:

- Up to 4-color offset printing on caps
- Up to 5-color offset printing on most jars
- 1-color hot stamping on most caps
- Banding
- Embossing and de-bossing

IN-HOUSE COLORS

We mold the rainbow. Whether you're using color to define a brand, or to brand within a brand, it's a great way to achieve a unique look that stands out on the shelf. Mold-Rite keeps a variety of standard pigments in house.

Don't see what you need? We can also match any specified color to support your brand. Color availability varies by manufacturing location.

When inquiring about these colors please reference the Mold-Rite #. Pantone #s are for reference only – not an exact match.

* This color is pearlescent ** This color is metallic *** This color is very transparent

TRUSTED

Committed to your success. Every day.

There's a reason Mold-Rite has been our customers' trusted partner for decades. Actually, there are seven:

- Respect for all
- Employee safety
- Professionalism and integrity at all levels
- Honest and open communication
- Ethical business practices
- Value in quality, delivery and service
- Exceeding customer expectations

We're committed to building relationships with our customers, suppliers and coworkers. But, at Mold-Rite, we don't just say it. We show it. Each day, these core values drive our business, strengthen our relationships and earn us the right to be your supplier of choice.

MOLD-RITE POLICIES

DECORATING

We are equipped to meet your hot stamping or offset printing requirements on our closures or jars at very competitive pricing. We reserve the right to over/under ship by 1.5%. Hot stamp die & artwork charges available upon receipt of approved samples. Offset plates & artwork charges available upon receipt of approved samples.

DESIGN AND MOLD BUILDING

Our excellent machine shop has the most modern equipment and is available to meet any of your custom mold requirements or to assist in any new product development.

COLORANTS

Our white colorant suppliers have certified that all white colorants supplied to Mold-Rite meet all FDA and USP regulation. None of our white colorants contain heavy metals. FDA status of colors is the responsibility of our customer.

SAMPLING

PLEASE NOTE: Testing for compatibility between caps, lining materials, containers and product is the responsibility of the customer solely. The customer is responsible for any premium service charges. Sample amount subject to approval.

RESINS

Mold-Rite uses only prime resins from major suppliers and all are FDA approved and have Drug Master Files with the FDA.

CLOSURE LINERS

All of our closure liners are certified as meeting all pertinent regulations.

RECYCLING

Our single wall and PP inner PP outer double wall jars and all our unlined closures are recyclable.

RETURNS

No returns without authorization (RA) number (FO RM SA 106). Restocking charges may apply. Returns must be within (90) days of invoice date. RAs are good for (60) days. After that returns will not be accepted. Unauthorized returns will be refused at delivery. If products are returned after (60) days, a 25% restocking fee will be assessed.

FREIGHT CLAIMS / DAMAGED GOODS

Customer assumes full responsibility for prompt filing of freight claims for goods damaged in transit. Claims must be filed within (5) business days of the receipt of goods. We will assist as required. Claim denials due to late or delinquent filing will be the customer's sole responsibility.

COMPATIBILITY

Our PP resin is not recommended for petroleum distillates. Certificate of Compliance issued with every order we process.

NEXT DAY AND 2ND DAY AIR SERVICES FOR STOCK PRODUCTS

We do our best to get overnight shipments out immediately. However, things can happen beyond our control. Therefore, we will not be responsible for premium charges when a shipment goes the following day. Any orders received after 11:30 am EST will be considered next day's business.

WEIGHTS

All weights given are in U.S. pounds and are accurate to within +/- 5%. Mold-Rite Plastics, LLC manufactures in accordance with good manufacturing process.
